FOCUS

AVAILABLE

Open to frontend roles, remote or Tehran-

Amirali Zand

Frontend Developer

3+ years shipping production interfaces

Frontend developer with 3+ years in React, Next.js and TypeScript. Owns features end to end; strongest on legacy code, breaking major upgrades, bug backlogs and measured performance. Builds AI into products and uses AI tooling daily to plan, review and ship.

Experience

Frontend Developer

Sib Irani

May 2025 - Present
Tehran, Iran

- Rebuilt the **Sib Irani** app-store platform from scratch in Next.js and TypeScript: hundreds of apps, 5M users, full PWA support with offline caching and no app-store download.
- Debugged **Brookli** end to end, shipped AI meal logging by photo and by voice, then moved the stack from React 18 to 19 and Material UI 4 to 9, JSS/makeStyles onto Emotion.
- Built **Face Age**, an AI facial-analysis feature driven by webcam capture and MediaPipe.
- Delivered the dashboards behind the **developer portal** local publishers use to submit, review and manage their apps.
- Owned the release process end to end — versioning, staging deployments, pre-production testing (Jest, React Testing Library, Playwright, Cypress) and the CI/CD workflow.
- Built a shared React component library used across [TODO: N] products; profiled rendering and API flow, cutting LCP from [TODO: X]s to [TODO: Y]s.

Frontend Developer

Amatis Dana Tech

[TODO: Mon] 2023 - [TODO: Mon] 2025
Tehran, Iran

- Shipped UI as sole frontend contributor across 5+ client and internal products [TODO: name product domains, e.g. e-commerce, dashboard, booking].
- Reduced page load time by [TODO: X]% by trimming bundle size and reworking the asset-loading strategy.
- Integrated REST APIs and worked directly with design and backend teams to ship features end to end.

Selected Projects

Sib Irani
sibirani.com

Alternative iOS & Android app store with hundreds of apps and 5M users. Rebuilt from a legacy class-based React codebase to Next.js and TypeScript.

Next.jsTypeScriptPWA

Brookli
app.brookliapp.com

Installable calorie-tracking PWA. Debugged and refactored end to end — React 18 to 19, MUI 4 to 9 — then given AI meal logging by photo and by voice.

React 19MUI 9PWAAI

Face Age
AI product | Sib Irani

Webcam-driven facial analysis estimating apparent age and skin condition in the browser, built on MediaPipe face landmarks.

ReactMediaPipeAI

Door Lock Shop
doorlock-shop.vercel.app
[TODO: GitHub repo Link]

Persian RTL storefront on Next.js 16 and Payload CMS 3, with a typed service layer over Postgres and the stack in one Docker command.

Next.js 16Payload CMSPostgreSQL

ALSO BUILT

smartShopNext.js 15 commerce, parallel and intercepting routes, server actionsPrisma, Clerk
