Amirali Zand

Frontend Developer

Dynamic frontend developer with over 3 years of experience specializing in React, Next.js, and TypeScript. Recently revitalized an app store serving 5 million users. Demonstrates strong ownership of features from inception to deployment, excelling in managing legacy code, implementing significant upgrades, and addressing bug backlogs while optimizing performance metrics. Adept at integrating AI features into products and leveraging AI tools daily for planning, reviewing, and delivering high-quality results. Committed to driving innovation and enhancing user experience through cutting-edge technology solutions.

PROFESSIONAL EXPERIENCE

MAR 2025 - PRESENT — SIB IRANI, TEHRAN

Frontend Developer, responsible for the app store frontend and its AI products

- Rebuilt the Sib Irani app store from scratch in Next.js and TypeScript, removing unused and harmful code from 70%+ of the legacy codebase; it serves 5M users and 100+ apps as a full PWA with offline caching.
- Cleaned up 100% of the Brookli codebase in the refactor phase, clearing the bug backlog before 2 major upgrades: React 18 to 19 and Material UI 4 to 9 (JSS/makeStyles to Emotion).
- Shipped 2 AI meal-logging modes in Brookli, photo and voice, both writing to the same meal record.
- Built Face Age, in-browser AI facial analysis on MediaPipe, and improved its performance and UX by tuning model loading; 0 images leave the device.
- Delivered the developer portal dashboards publishers use to submit, review and manage apps, across backend, design and product teams.
- Owned releases across 3 environments (staging, pre-production, production): versioning, CI/CD and testing with Jest, React Testing Library, Playwright and Cypress.
- Built a shared React component and PWA layer reused in 2 products (Sib Irani, Sib Bazar); profiled rendering and API flow to cut load times.

SEP 2023 - MAR 2025 — AMATIS DANA TECH, TEHRAN

Frontend Developer, React UI for client and internal products

- Built and shipped React UI for 5+ client and internal products as an individual contributor.
- Reduced page load times by trimming bundle size and reworking the asset-loading strategy.
- Integrated REST APIs with design and backend teams, taking features from mockup to production.

PROJECTS

DOOR LOCK SHOP — DOORLOCK-SHOP.VERCEL.APP

Next.js 16, Payload CMS 3, PostgreSQL, Docker | github.com/2az2000/door-lock-shop

- Implemented complete technical SEO: 4 schema.org JSON-LD types (Organization, Product, Article, BreadcrumbList), a dynamic sitemap of every category, product and article, robots.txt, and canonical and Open Graph metadata.
- Gave editors per-page SEO title and description overrides in Payload CMS; a typed service layer is the only path from the UI to the CMS.
- Persian RTL storefront split into storefront and admin route groups on 1 deploy; migrations run before every build and 1 Docker command starts the stack.

SIB IRANI PRODUCTS — SIBIRANI.COM

- **Sib Irani** (Next.js, TypeScript, PWA): alternative iOS and Android app store with 100+ apps and 5M users, rebuilt from a legacy class-based React codebase.
- **Brookli** (React 19, Material UI 9, Emotion, PWA; app.brookliapp.com): calorie-tracking PWA; every makeStyles block moved to Emotion and the theme stepped 1 major at a time to MUI 9.
- **Face Age** (React, MediaPipe): estimates apparent age and skin condition from 1 webcam frame, fully on-device, with model loading tuned for a fast first result.

ALSO BUILT

- **smartShop**: Next.js 15 store with parallel and intercepting routes and server actions; Prisma, Clerk.
- **Sib Bazar**: iOS store that installs apps with no Apple ID via Adhoc signing; React, TypeScript, PWA.
- **Weather**: React Native app with 7 feature slices in clean architecture, 2 languages and offline cache; Expo, TanStack Query.
- **fabioCoffee**: ordering menu and admin panel on 1 schema with 2 JWT roles; Next.js, Express.js, Prisma.
- **Diamond Laundry**: laundry back-office with OTP login, invoicing and customer records; React, Vite.

SKILLS

Languages and Frameworks: JavaScript (ES6+), TypeScript, React, Next.js, React Native, HTML5, CSS3
Styling and UI: Tailwind CSS, Material UI (MUI), Emotion, shadcn/ui, Sass, Framer Motion, GSAP
State and Data: Redux Toolkit, TanStack Query (React Query), REST APIs, Prisma, PostgreSQL, MongoDB
Web Platform: PWA, SSR/SSG/ISR, Technical SEO, Core Web Vitals, Accessibility (a11y), i18n and RTL, Storybook, MediaPipe
Backend and DevOps: Node.js, Express.js, Docker, Git, CI/CD, Vite
Testing: Jest, React Testing Library, Vitest, Playwright, Cypress

EDUCATION

2023 — IRAN DATA PROCESSING UNIVERSITY, TEHRAN

B.Sc. Software Engineering, Web Design track

LANGUAGES

Persian - Native | English - Professional

CERTIFICATIONS

Advanced Web Development, Tehran Technical Complex
