Experience

Frontend Developer | Sib Irani

Mar 2025 - Present
Tehran, Iran

- Rebuilt the **Sib Irani** app store from scratch in Next.js and TypeScript, removing unused and harmful code from **70%+** of the legacy codebase; it serves **5M users** and **100+ apps** as a full PWA.
- Cleaned up **100%** of the **Brookli** codebase in the refactor phase, then led **2 major upgrades**: React 18 to 19 and Material UI 4 to 9, rewriting JSS/makeStyles in Emotion.
- Shipped **2 AI meal-logging modes** in Brookli, photo and voice, both writing to the same meal record.
- Built **Face Age**, in-browser AI facial analysis on MediaPipe, and improved its performance and UX by tuning model loading; **0 images** leave the device.
- Delivered the **developer portal** dashboards publishers use to submit, review and manage apps, across backend, design and product teams.
- Owned releases across **3 environments** (staging, pre-production, production): versioning, CI/CD and testing with Jest, React Testing Library, Playwright and Cypress.
- Built a shared React component and PWA layer reused in **2 products** (Sib Irani, Sib Bazar); profiled rendering and API flow to cut load times.

Frontend Developer | Amatis Dana Tech

Sep 2023 - Mar 2025
Tehran, Iran

- Built and shipped React UI for **5+** client and internal products as an individual contributor.
- Reduced page load times by trimming bundle size and reworking the asset-loading strategy.
- Integrated REST APIs with design and backend teams, taking features from mockup to production.
