FOCUS

- Rendering & bundle performance
- Installable, offline-capable PWAs
- Reusable component architecture
- Release & CI/CD ownership

AVAILABLE

Open to frontend roles — remote or Tehran-based. React · Next.js · TypeScript.

Amirali Zand

Frontend Developer

3+ years
shipping production interfaces

Frontend developer with 3+ years in React, Next.js and TypeScript. I own a feature end to end, and I am at my best on what teams put off: legacy code, breaking major upgrades, bug backlogs, and performance that has to be measured rather than guessed. I build AI into products and work with AI tooling daily, as part of how I plan, review and ship.

Experience

SI

Frontend Developer · Sib Irani

May 2025 – Present
Tehran, Iran

- Rebuilt the **Sib Irani** app-store platform from scratch in Next.js and TypeScript: hundreds of apps, 5M users, full PWA support with offline caching and no app-store download.
- Debugged **Brookli** end to end, shipped AI meal logging by photo and by voice, then moved the stack from React 18 → 19 and Material UI 4 → 9, JSS/makeStyles onto Emotion.
- Built **Face Age**, an AI facial-analysis feature driven by webcam capture and MediaPipe.
- Delivered the dashboards behind the **developer portal** local publishers use to submit, review and manage their apps.
- Owned the release process end to end — versioning, staging deployments, pre-production testing and the CI/CD workflow.
- Established a reusable React architecture and shared component layer, then profiled and reworked rendering and API flow to cut load times.

AD

Frontend Developer · Amatis Dana Tech

2023 – 2025
Tehran, Iran

- Built and shipped React UI components across several team projects as an individual contributor.
- Reduced page load times by trimming bundle size and reworking asset loading strategy.
- Integrated REST APIs and worked directly with design and backend teams.

Selected Projects

Sib Irani

sibirani.com

Alternative iOS & Android app store with hundreds of apps and 5M users. Rebuilt from a legacy class-based React codebase to Next.js and TypeScript.

Next.js TypeScript PWA

Brookli

app.brookliapp.com

Installable calorie-tracking PWA. Debugged and refactored end to end — React 18 → 19, MUI 4 → 9 — then given AI meal logging by photo and by voice.

React 19 MUI 9 PWA AI

Face Age

AI product · Sib Irani

Webcam-driven facial analysis estimating apparent age and skin condition in the browser, built on MediaPipe face landmarks.

React MediaPipe AI

Door Lock Shop

doorlock-shop.vercel.app

Persian RTL storefront on Next.js 16 and Payload CMS 3, with a typed service layer over Postgres and the stack in one Docker command.

Next.js 16 Payload CMS PostgreSQL

ALSO BUILT

Sib Bazar iOS store on an in-house Adhoc signing pipeline**smartShop** Next.js 15 commerce — parallel & intercepting routes, server actions**Weather** React Native clean architecture, forecasts cached offline**fabioCoffee** Café ordering menu and admin panel over one Express API**Diamond Laundry** Laundry back-office — OTP login, invoicing, customers
